Your opinion counts

How are we doing?

Q: In order to reduce the cost of the messaging system and to make it more sustainable, the option of enabling a limited number of vetted commercial suppliers to sponsor messages may be considered in the future. This would mean that your existing emails could include a small banner advert at the bottom.

- You would be able to turn off all sponsored banner adverts
- No sponsor would ever be able to access your details
- All businesses would be vetted and sign a service guarantee charter
- The funds would go towards paying for the system and funding telephone and text messages

Should it ever be possible for commercial companies to sponsor messages?

Please click the answer below that most closely represents your opinion

No, sponsored messages should never be allowed

Maybe for others but I would turn them off

I have no problem with sponsored messages I would just ignore them

Yes, I would actively support sponsors adds if it helps keep the messaging system
